

**ABOUT ME:** Highly organized, team player who can also go it alone and hit the ground running on a project. Have worked in very fast paced environments with little to no time to get a project done. Did I say I don't rattle that easily under stress, well I don't. My prioritization skills just kicks in and I get the job done. I have worked in a large agency, small agencies and freelance. With my work ethic and experience I will treat any design task with the up most attention and detail. In the end making the client happy is the number one priority.

Oh and just a few more skills I have:

- Art Direction of Photographers, Illustrators, Copywriters & other creatives
- Copywriting
